

The background of the slide is a dark teal color with several stylized, glowing green virus particles scattered across it. These particles have a spherical body with small dots on the surface and several thin, radiating spikes or tentacles.

COVID19 HOTSPOTS IN INDIA

24 APRIL, 2020

COVID19 HOTSPOTS IN INDIA

According to official sources, 'hotspots' have been identified on the basis of areas where large COVID-19 outbreaks have been reported or in clusters with a significant spread of the disease according to the guidelines issued by the Ministry of Health and Family Welfare (MoHFW), Government of India.

LEGEND

RED ZONE: All the hotspot districts with large outbreaks and clusters

ORANGE ZONE: Districts which have not seen any new cases in the last 14 days

GREEN ZONE: All the non-infected districts are currently considered as Green Zones. A red zone district can be moved to the green zone if there is no new case seen in the last 28 days and an orange zone district can be moved to the green zone if there is no new case seen in the last 14 days.
