

PART – A GENERAL ENGLISH

(Marks: 25)

Read the following passage and answer the questions 1 to 5.

In Spring season, polar bear mothers emerge from the dens with three-month old cubs. The mother bear has fasted for as long as eight months but that does not stop the young from demanding full access to her remaining reserves. If there are triplets, the most persistent stands to gain an extra meal and it may have the meal at the expense of others. The smallest of the little forfeits many meals to stronger siblings. Females are protective of their cubs but tend to ignore family rivalry over food. In 21 years of photographing polar bears, I've only once seen the smallest of triplets survive till Autumn.

 - (2) The battle for survival among the cubs.
 - (3) The cubs' demand for food from the mother.

- 4. Where is the notion of 'survival of the fittest' seen in the passage?
 - (1) In the hungry mother feeding the young cubs.
 - (2) In the smaller cubs giving up many meals for bigger ones.
 - In the smallest of the cubs finding herself unequal in the race for food.
 - (4) In the stronger cubs sharing food with the weaker ones.
